WORK EXPERIENCE

Full Stack Developer
PeopleGrove

12/2022 - Present   *Mumbai, India*

Achievements/Tasks

- Develop complete scalable features in a distributed environment consisting over 6 microservices.
- Resolve time sensitive bugs and make overall application more accessible (WCAG 2.0 Level AA completed, aiming for WCAG 2.0 Level AAA) for people with disabilities to streamline user experience.
- Optimise essential apis by streamlining blocking processes for a more polished experience.
- Create complex user facing, accessible components used by over 32+ universities with user count.

Software Development Engineer
JungleWorks

12/2021 - 12/2022   *Chandigarh, India*

Achievements/Tasks

- Debugged and resolved complex problems in a time limited, fast-paced environment.
- Utilised strategic engineering procedures to maintain, improve and develop requested features using Node and SQL.
- Documented product workflow and applications for a more readable and maintainable codebase.

Software Development Engineer
Felix Healthcare AI

08/2020 - 12/2021   *Bengaluru, India*

Achievements/Tasks

- Designed, developed and deployed software applications easing workflow and automating essential tasks with great accuracy using Django and Docker.
- Optimised time-consuming APIs to slice waiting time by 75 percent.
- Research patterns and visualise essential purchasing trends using big data technologies like Apache spark, Hadoop and Python.

EDUCATION

Bachelors of Engineering (CSE)
Chitkara University

08/2017 - 08/2021   *9.5/10 CGPA*

SKILLS

Node | React | Angular | Docker | Python
SQL | Athena

ACHIEVEMENTS

Competed with 7 early stage startups for Series A funding for my own startup.

Leaded development of an in-house tool in Felix Healthcare AI, despite being the youngest in the team.

CERTIFICATES

AWS Fundamentals (04/2020 - 06/2020)
This specialisation gives an overview of the features, benefits, and capabilities of Amazon Web Services with real life applications and scenarios.
